Today I attended VMware's Explore US event, where I had the opportunity to field questions from the VMware community, including about the benefits of a Broadcom-VMware combination.

This event was an excellent opportunity for VMware to showcase its compelling offerings and the energy in the room was palpable. Thank you, again, to the VMware team for having me and for giving us all a firsthand look at your latest innovations.

My VMware Explore Experience

By: Hock Tan, President and Chief Executive Officer

August 30, 2022

This morning I enjoyed experiencing the General Session at VMware Explore US. There was compelling content and tremendous energy in the room coming from the entire VMware community. I'm confident that attendees will benefit from the rest of the event and all that VMware Explore has to offer.

VMware's Innovation News

As part of Explore, VMware announced a series of new innovations for its Cloud & Edge Infrastructure, Anywhere Workspace, and Cloud-Native applications and management platforms.

New innovations in vSphere 8 and vSAN 8, when they come to market, will help customers dramatically improve how they run, manage and secure their different enterprise applications. And the VMware Cloud Foundation+ will provide customers with consistent infrastructure and operations across private and public clouds at scale, becoming the foundation of VMware's Edge portfolio. VMware's new Aria portfolio gives customers a powerful multi-cloud management system that can also be connected to the management of their private cloud. These will be compelling offerings across the entire VMware portfolio.

I also had the opportunity to walk the expo floor and observed all the activity across VMware's robust ecosystem of partners, customers and employees. I'm sure this energy will transfer to the event's technical sessions, where customers can learn more about VMware's innovations.

Transaction Benefits

Following the close of the transaction, the combination of Broadcom and VMware will continue to provide customers an innovative, flexible and sustainable software platform, enabling them to build, run, manage, connect, deliver and protect their applications -- everywhere. Whether it be on premises, in a private cloud, multiple clouds or at the edge, solutions from the combined Broadcom and VMware organization will give customers greater choice to address their most complex IT infrastructure challenges.

With the completion of this transaction, Broadcom will be a new participant in the multi-cloud era, and VMware will be the flagship of our combined software offerings. Together, we will be guided by a commitment to provide customers more control, flexibility, and choice to design and navigate their IT software platforms.
