Non-GAAP Financial Measures

The non-GAAP measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. A reconciliation between GAAP and non-GAAP financial data is included in the supplemental financial data attached to this press release. Broadcom believes non-GAAP financial information provides additional insight into the Company's on-going performance. Therefore, Broadcom provides this information to investors for a more consistent basis of comparison and to help them evaluate the results of the Company's on-going operations and enable more meaningful period to period comparisons.

In addition to GAAP reporting, Broadcom provides investors with net income, operating income, gross margin, operating expenses, cash flow and other data on a non-GAAP basis. This non-GAAP information excludes amortization of acquisition-related intangible assets, stock-based compensation expense, restructuring and other charges, acquisition-related costs, including integration costs, non-GAAP tax reconciling adjustments, and other adjustments. Management does not believe that these items are reflective of the Company's underlying performance. Internally, these non-GAAP measures are significant measures used by management for purposes of evaluating the core operating performance of the Company, establishing internal budgets, calculating return on investment for development programs and growth initiatives, comparing performance with internal forecasts and targeted business models, strategic planning, evaluating and valuing potential acquisition candidates and how their operations compare to the Company's operations, and benchmarking performance externally against the Company's competitors. The exclusion of these and other similar items from Broadcom's non-GAAP financial results should not be interpreted as implying that these items are non-recurring, infrequent or unusual.

Free cash flow measures have limitations as they omit certain components of the overall cash flow statement and do not represent the residual cash flow available for discretionary expenditures. Investors

should not consider presentation of free cash flow measures as implying that stockholders have any right to such cash. Broadcom's free cash flow may not be calculated in a manner comparable to similarly named measures used by other companies.

(1) Non-GAAP adjustment for the number of shares used in the diluted per share calculations excludes the impact of stock-based compensation expense expected to be incurred in future periods and not yet recognized in the financial statements, which would otherwise be assumed to be used to repurchase shares under the GAAP treasury stock method.

(2) Includes the impact of a ten-for-one forward stock split of our common stock. Stockholders of record after the close of market on July 11, 2024 will receive an additional nine shares of common stock for each share held after the close of market on July 12, 2024. At market open on July 15, 2024, trading is expected to commence on a split-adjusted basis.
